THL Report March 28th, 2026

- The **May** issue of *THL* is complete and in final review stage. The lead feature of the issue is a comprehensive article on the Indianapolis Union Railway by John Fuller. The second feature article covers the Monon's trio of Fairbanks-Morse diesels.
- The **August** issue of *THL* includes the second part of our "Monon in Chicago" coverage with an expansive article by Gary Dolzall on the Chicago & Western Indiana and the Monon at Hammond. The second feature article is an all-color presentation of the Monon photography of Bill Schnaiter. Content of this issue is largely complete.
- The **November** issue of *THL* will be an issue-length coverage of the "Monon in Monon (Indiana)." The issue will include four articles covering Monon-at-Monon history and operations, stations, and signal systems accompanied by a robust selection of photography. Authors include Mike Aufderheide, Larry Ratcliffe, and the Dolzall brothers. Development of this issue is also largely in place.
- **2027 Calendar.** . A selection of photos suitable for a 2027 calendar has been identified. Beyond that no additional work on the calendar is underway, we will complete the project if the go forward position is clarified, and would prefer knowing sooner rather than later, so we can work on that after August issue is put to bed.

Gary and Steve Dolzall

Don's Notes: Discussions have ensued about 2027 and future Calendars-The cost of 2026 calendar was \$
We are now providing 4 complete Hoosier Lines with additional pages for most issues. Most Societies do not include Calendars with membership, especially with 4 issues of a magazine.
